

Diesel Service Technology Instructor

Job Description

- Teach Diesel Service Technology courses in classroom, laboratory, hybrid, and online formats as assigned.
- Provide instruction in diesel engines, powertrain systems, hydraulic systems, electrical systems, preventive maintenance, diagnostics, safety procedures, and related technical subjects.
- Develop, implement, and assess instructional activities that promote student achievement and workforce readiness while maintaining a safe and organized learning environment.
- Evaluate student performance and maintain accurate attendance, grading, and academic records.
- Perform other duties as assigned.

Qualifications

- Associate's degree or a combination of education, industry certification, and/or documented occupational experience.
- Two (2) to four (4) years of recent occupational experience in diesel service, heavy equipment maintenance, truck repair, agricultural equipment repair, or a related field.
- Demonstrated knowledge of diesel engine systems, diagnostics, maintenance practices, and shop safety procedures.
- Strong communication, organizational, and interpersonal skills.
- Ability to work effectively with students, faculty, staff, and industry partners.

Application Process

Please submit a UA-EACC application, resume, and CV with three work references and transcript(s) via the UA-EACC employment website. For more information and to apply, visit www.eacc.edu. Review of applications will begin immediately and continue until the position is filled. A background check will be conducted prior to employment.
